

## Values & Vision

### **Responsible: Committed to ethical and responsible conduct**

We are determined to meet – and wherever possible, exceed – all legal and ethical requirements. Our responsibility is to conduct all business according to the highest professional and ethical standards and practices: There must be no tolerance for non-compliant behavior.

### **Our Values**

- forthrightness
- candidness
- confidence
- fairness

### **Our Vision**

The Business Unit Automation Components is a globally active, leading supplier of high quality components and feeding solutions for the assembly automation. The requirements of the OEM's and end users in industrialized countries are our guidelines. Our customers benefit from the reliable and highly modular components and feeding solutions, including full support, short delivery times as well as the lowest „Total Cost of Ownership“.

### **Sustainable success**

To achieve the highest performance with the highest ethics, we are committed to integrate our vision and our values into daily business decision-making. Over the long term, the greatest success comes to those companies who succeed in meeting their business partner requirements while staying true to the company's values and vision.
